Fiscal Note Version – New

Description

House File 2271 modifies the current shared operational functions supplementary weighting provision for school districts to change the weighting structure to provide funding on a per function basis. Additionally, this Bill reduces the number of functions that are eligible to receive the incentive funding.

Background

The shared operational functions provision was originally enacted in 2007 and implemented in FY 2008 through FY 2014. This provision provided supplementary weighting for superintendent management, business management, human resources, transportation, or operation and maintenance, and phased out funding over a five-year period. During the 2013 legislative session, **HF 472** was enacted and created a new provision for shared operational functions, including an expansion of the eligible functions.

Based on the increased interest by school districts in the new provision and potential fiscal impact, the Department of Education established administrative rules that required district staffing levels for the specific shared function to remain at or below the staffing levels in the baseline year (designated as FY 2013 by the Department) for a district to be eligible to receive the supplementary weighting. The Administrative Rules Committee placed a session delay on the rules. However, the supplementary weighting for shared operational functions data was collected by Department of Education based on the proposed rules. Based on this data, the current level of supplementary weighting included in the FY 2015 school aid estimate totals 4,345.19. Additionally, the current FY 2015 school aid estimate includes \$27.8 million for this provision, including \$24.4 million in State aid.

Assumptions

Assumptions include:

- Changes in the provision will be implemented for FY 2015.
- Estimates are based on the Department of Education's Fall data collection and include functions that were not approved based on the Department's proposed rules.
- The amount of total weighting beginning in FY 2016 through FY 2020 is unknown, but will be at least at the FY 2015 level.
- The maximum level of weighting any district could generate totals 34.0, and the statewide funding level could total \$75.3 million if all districts are at the maximum weighting level. The maximum funding level may increase with enactment of the State percent of growth in future fiscal years.
- Current supplementary weighting and funding amounts for Area Education Agencies (AEAs) will not be impacted by the Bill.
- The FY 2015 funding level changes resulting from this Bill will be compared to current estimated included in the FY 2015 School aid estimate.

Fiscal Impact

Based on this Bill, the FY 2015 supplementary weighting will generate an estimated total of \$13.2 million including \$11.6 million in State aid and \$1.6 million in local property taxes. This is a reduction in the total of \$14.6 million, including \$12.8 million in State aid and \$1.8 in property taxes, compared to the current FY 2015 school aid estimate.

The estimated impact in FY 2016 through FY 2020 is unknown, but will be at least at the level of FY 2015. Additionally, the maximum capacity funding level beginning in FY 2016 will be approximately \$75.3 million, including \$66.1 million in State aid and \$9.2 million in local property taxes.
